RE: CHV Asphalt Repairs

Dear Cherry Hill Village Resident:

This communication is to alert residents that asphalt repairs will be started on the week of September 4th throughout CHV (WEATHER PERMITTING). The repairs will be in the streets, alleys and some CHV II Attached Condominium driveways. We ask you to please be cautious in these areas when leaving and returning to your residence. When leaving and returning, you may have to use the other end of the alley to access your home or may have to park on the street. Also if your garage backs up to area marked on the map you may want to move your car to the street the evening before (to avoid being blocked in your garage), as the contractors will be starting early.

The process will most likely be a three day process; with milling the asphalt and removing the debris on the first day, followed by laying down the new asphalt which may take two days (**WEATHER PERMITTING**). Please check attached map for asphalt repair locations.

Please turn off lawn sprinklers if they interfere with an area of work located on the map or if there are markings on the street or alley near your unit.

We apologize for any inconvenience.

Thank you for your cooperation,

Jeff McDuff, Site Manager
